

AI ARC™

AI Adoption Readiness Check

Start smart. Move fast. Avoid costly detours.

What is AI ARC™?

AI ARC™ is our proprietary, strategic adoption readiness check designed to help forward-thinking organisations assess how prepared they really are to adopt Artificial Intelligence. It gives you clarity, not guesswork — and ensures that your AI investments are grounded in real organisational readiness.

Whether you're just beginning your AI journey or preparing to scale, this assessment gives you a structured, objective view of where you stand and what steps to take next.

What's Included?

Every AI ARC™ engagement includes:

Readiness Across Five Core Dimensions

Your Readiness Scorecard

You'll receive a custom Readiness Scorecard visualising your maturity across these domains — identifying your strengths, friction points, and hidden risks. The scorecard is accompanied by a tailored strategic report that translates assessment findings into actionable insights specifically for your organisation's context and goals.

Each dimension is rated on a 5-point scale with detailed breakdowns of subdimensions, giving you both high-level overview and granular insights. This data-driven approach removes guesswork from your AI strategy, helping you prioritise initiatives that will deliver the greatest impact with the least resistance.

Armed with your scorecard, leadership teams can align on a shared understanding of current capabilities, set realistic implementation timelines, and make informed decisions about resource allocation. This clarity prevents the common pitfalls of AI adoption: overambitious projects, underestimated complexity, and misaligned expectations.

Deliverables You'll Receive

Our AI ARC™ process delivers a comprehensive package of actionable insights and strategic guidance. Each deliverable is carefully designed to translate assessment findings into clear, implementable steps that drive your AI adoption forward with confidence and precision.

Stakeholder Readiness Workshop

Optional virtual/in-person session that aligns key decision-makers, builds consensus on AI priorities, and identifies potential resistance points. This collaborative workshop ensures that leadership understands the assessment process and is prepared to act on recommendations.

AI ARC™ Readiness Scorecard

Comprehensive 5-dimension model that quantifies your organisation's readiness across People, Culture, Data, Technology and Governance. The visual scorecard provides both high-level overview and detailed subdimension analysis, making it easy to identify strengths and improvement areas at a glance.

Strategic Readiness Report

Detailed analysis with prioritised insights that connects assessment findings to your specific business context and objectives. This actionable document includes benchmarking against industry standards and provides a sequenced roadmap for addressing gaps in your AI readiness.

Risk Register

Comprehensive document outlining key blockers and exposures that could derail your AI initiatives. Each identified risk includes severity ratings, potential business impact, and specific mitigation strategies to help you proactively address vulnerabilities before they become problems.

AI Pathway Recommendations

Strategic guidance on what to fix and what to leverage, with clearly defined short and long-term action steps. These tailored recommendations help you capitalize on existing strengths while systematically addressing capability gaps, ensuring the most efficient path to AI maturity.

Executive Summary Briefing

Optional leadership-level presentation that distills complex findings into strategic insights for C-suite and board members. This executive-friendly format focuses on business implications, investment considerations, and competitive advantages of your AI readiness position.

Together, these deliverables provide a complete picture of your organisation's AI readiness and a clear path forward. The structured approach ensures that your AI strategy isn't built on assumptions, but on objective assessment and expert analysis. This foundation significantly increases the likelihood of successful AI adoption while reducing the risk of costly missteps or stalled initiatives.

Why Clients Choose AI ARC™

Avoid wasted investment

On AI solutions your team isn't ready to adopt

Align your C-suite

On AI strategy and preparedness

Uncover blind spots

In data, governance, or culture

Move forward with confidence

Backed by a clear roadmap

Is This For You?

AI ARC™ is ideal for:

First-time AI adopters

Organisations exploring their first major AI initiative

Teams under pressure

Teams under pressure to innovate without clear internal alignment

Risk-conscious businesses

Businesses looking to de-risk AI investment before scaling

Strategic leaders

Strategy, Transformation, and Digital leaders ready to make informed decisions

Ready to Find Out Where You Stand?

Book a discovery session to explore how AI ARC™ can support your organisation.
